It has been pointed out that there is an error in our recent paper (Rentz et al., 2012). On p. 24 we designated *Miniagraecia viridis* Rentz, Su, Ueshima sp. nov. as the type species of the new genus *Miniagraecia*. However there is no such species. There was a manuscript change in the name of the species and we did not catch it in the type species designation. *Miniagraecia* is therefore a nomen nudum. *Miniagraecia viridis* is not a nominal species and *Miniagraecia* does not now have a fixed type species (International Code of Zoological Nomenclature, Article 67.1).

We are now fixing *Miniagraecia milyali* Rentz, Su & Ueshima, 2012 as the type species for *Miniagraecia*. *Miniagraecia* will then take new authorship and date, on the date on which this correction is published. Readers should refer to the paper (Rentz et al., 2012) for the full description of the genus and its species.

Thanks to Dr Bruce Halliday for advice on this matter.
